The hazards of this material are due mainly to its severely irritant properties on skin and mucosal surfaces. Due to the irritant nature of the material, the stomach should be evacuated carefully in cases of poisoning by swallowing.

Section 5 - Fire Fighting Measures

Flash Point: N/A

LEL:

UEL:

EXTINGUISHING MEDIA: Extinguish fires with water spray or apply alcohol-type or all-purpose-type foam by manufacturer's recommended techniques for large fires. Use carbon dioxide or dry chemical media for small fires.

UNUSUAL FIRE AND EXPLOSION HAZARDS: During fire, oxides of nitrogen may be evolved.

HAZARDOUS COMBUSTION PRODUCTS: Burning can produce the following products: Oxides of carbon and nitrogen. Carbon monoxide is highly toxic if inhaled; carbon dioxide in sufficient concentrations can act as an asphyxiant. Acute overexposure to the products of combustion may result in irritation of the respiratory tract.

FIRE FIGHTING PROCEDURES: Do not direct a solid stream of water or foam into burning molten material; this may cause spattering and spread the fire.

SPECIAL PROTECTIVE EQUIPMENT FOR FIREFIGHTERS: Use self-contained breathing apparatus, eye protection, and protective clothing.

Section 6 - Accidental Release Measures

Steps to be Taken if Material is Released or Spilled: Contain spilled material if possible. Collect in suitable and properly labeled containers. See Section 13, Disposal Considerations, for additional information.

Personal Precautions: Evacuate area. Refer to Section 7, Handling for additional precautionary measures. Keep upwind of spill. Ventilate area of leak or spill. Only trained and properly protected personnel must be involved in clean-up operations.

Environmental Precautions: Prevent from entering into soil, ditches, sewers, waterways and/or groundwater. See Section 12, Ecological Information.

Section 7 - Handling & Storage

General Handling: Do not get in eyes, on skin, on clothing. Avoid breathing vapor.

Do not swallow. Wash thoroughly after handling. Keep container closed. Use with adequate ventilation. Do not use sodium nitrite or other nitrosating agents in formulations containing Suspected cancer-causing nitrosamines could be formed. See Section 8, EXPOSURE CONTROLS AND PERSONAL PROTECTION.

Ventilation: Provide general and/or local exhaust ventilation to control airborne levels guidelines.

Respiratory Protection: Atmospheric levels should be maintained below the exposure guideline. When airborne exposure guidelines and/or comfort levels may be exceeded, use an approved air-purifying respirator. For emergency response or for situations where the atmospheric level is unknown, use an approved positive-pressure self-contained breathing apparatus or positive-pressure airline with auxiliary self-contained air supply.

Ventilation: Provide general and/or local exhaust levels below the exposure guidelines.

Eye Protection: Monogoggles.

Protective Gloves: Polyvinyl chloride coated Rubber.

Other Protective Equipment: Eyebath, safety shower, and chemical apron.
